<b>LYRIC</b>					
Lyric AIO	YES	NO	YES	All Revisions	LYRICLTE-A/LYRICLTE-V (optional)
Lyric Gateway	YES	NO	YES	All Revisions	LYRICLTE-A/LYRICLTE-V (optional)

### \*NOTES

All LYNX panels have an add on module for Z-Wave and WI-FI (L5100-Z-Wave & L5100-Wi-Fi)

All LYNX panels have an add on module that can be used to hardwire an internet connection (ILP5)

GSMX4G & CDMA are discontinued products upon stock exhaustion

The Vista-21IP will support TC2 with internal communicator version 2.6.42. Vista-21IP (version 2.10.15+) with Date Code S300+ will support the VISTA-GSM4G. Even if the Vista-21IP does not support the VISTA-GSM4G, it will support an external communicator on the ECP bus

L5200 and L7000 panels must be at rev 9.00201 or higher to support the LTE communicators

Lyric panels must be at version 01.03.06549.482 or higher to support the LTE

The TUXEDO color touchscreen keypad and the VAM Vista Automation Module have built-in Z-Wave controllers. When connected to the Internet, they can be associated with Total Connect accounts. Total Connect accounts require radio communicators (listed above) must be associated with a Total Connect account.
